Compact, Reliable and Efficient

Our heat pump powered radiators and cooling units range have been designed and tested to address the specific needs of residential and light commercial buildings. Guaranteed to work down to -15°C outdoor temperature and provide warmth and comfort even on the coldest days.

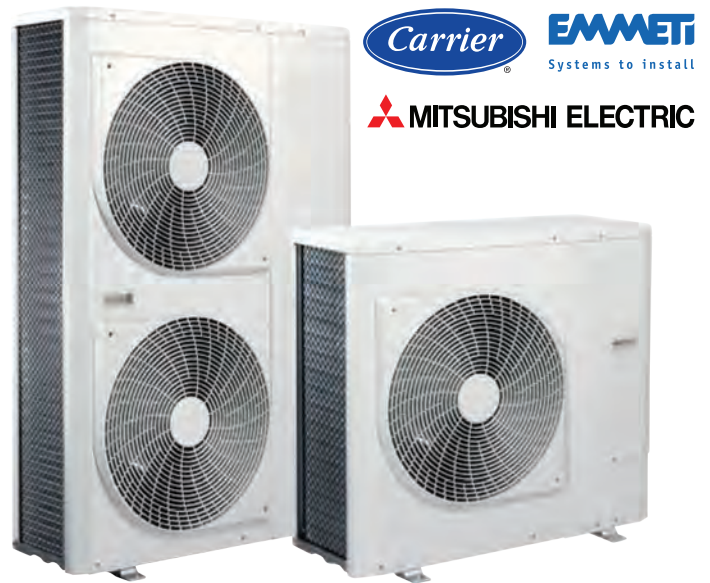

Our heat pumps incorporate reliable quality components in compact chassis with advanced electronic inverter controls.

All offer an exceptionally high energy efficiency ratio in both heating (COP) and cooling (EER). This translates into substantial savings for the user. \$1 of power = approx \$3.90 of heating and \$1 of power = approx \$3.60 of cooling.

- Comfort
- Low Sound Levels
- Domestic Hot Water Available
- Programmable wall thermostats
- Also available in WiFi

Wall and ceiling heating and cooling units

PURMO 
clever heating solutions

Purmo High-end Radiators are manufactured to British standard meeting elegance to match any home's internal beauty and ambience

The Delta H are fully laser welded, steel column radiators. These have very low dust emission and are easy to clean and ideal for uses in hospitals, schools etc.

The Plan compact Ventil combines the timeless elegance of a perfectly flat front with the advantages of an integrated valve connection.

The Ramo Ventil has a sectioned front, straight side panels and a decorative top grille.

Colours: Our standard colour is white RAL 9016. Other RAL. Special colour items are made to order and are indent ordered directly from Europe, they must be paid for at the time of order.

Showroom 223 Kaikorai Valley Road, Dunedin.
